Projects

edvgerial.kapitalbank.az

VATrefund is a project that enables customers to get refunded some portion of VAT. As of today, over 1.6 million users have been registered in the portal and get refunded 130 million AZN over 250 million payment receipts and it still going on increasing.

In the web section: HTML, SCSS, Javascript, EJS

In the admin panel section: Typescript, Vue Js (Vuex), SASS / SCSS, Webpack, ExpressJs and some libraries for Vue, for example: vue-select, vue-toasted, v-quill-editor, vuejs-datepicker

ipoteka.kapitalbank.az

My second project was ipoteka.kapitalbank.az, the main purpose of this project is to give customers the opportunity to order an online mortgage loan, to provide more information about mortgage products and related campaigns, The main goal of the team is to make this project the number one mortgage site in Azerbaijan. Technologies used:

In the web section: Typescript, React Js (Context API, Hooks), SASS / SCSS, Webpack, ExpressJs and several libraries for React, for example: react-hook-form, react-query, react-select

In the admin panel section: Typescript, Vue Js (Vuex), SASS / SCSS, Webpack, ExpressJs and some libraries for Vue, for example: vue-select, vue-toasted, v-quill-editor, vuejs-datepicker

birkart.az (birbank.az)

My first project was the Birkart.az project, which is to get information about Kapital Bank's online ordering of debit and credit cards, partners cooperating with the bank, their campaigns, the bank's own campaigns and news. To get information about credit histories, transactions and cards they have in the personal account of clients. I worked with the team on this project. The technologies used:

In the web section are: Typescript, React Js (Context API, Hooks), SASS / SCSS, Webpack, ExpressJs, and several libraries for ReactJs, such as react-select, react-helmet, react-input-mask, react-datepicker

In the admin panel: Typescript, Vue Js (Vuex), SASS / SCSS, Webpack, ExpressJs, and some libraries for Vue, such as vue-select, vue-toasted, v-quill-editor, vuejs-datepicker

payriff.com

We provide easy integration tools for your online store as well as complex integration possibilities. Your transactions will be 3D Secure and relevant with PCI-DSS requirements. You can track your transactions online through the merchant dashboard. We creating some internal applications and public applications for Azerbaijan and Pakistan.
